

ASEAN IWRM PERFORMANCE REPORTS & MONITORING INDICATORS

Indonesia Summary Report (Water Pollution Management)

IWRM Issue 5 – Water Pollution Management (18 indicators)			
Indicator Types	Indicators	2010	2013
Outcome Indicators	1. Percentage of monitored water bodies' ambient water quality meeting designated uses (agriculture, water supply, fisheries, industrial, etc.)	38.46 %	100 %
	2. Percentage of industrial/domestic effluent discharge complying with the country's effluent discharge standard	-	26.57 %
EE Indicators	1. Any "Policy" on water pollution control	Yes (8)	Yes (8)
	2. Any "Legislation/regulation" for water pollution control (i.e. for the management of water quality and wastewater quality)	Yes (8)	Yes (8)
	3. Any "Financial framework and Financing plans" for water pollution control	Yes (8)	Yes (8)
IS Indicators	1. Any "Agency/Department" responsible for water pollution control	Yes (8)	Yes (8)
	2. Any "Steering committee" on river water quality and environmental issues (e.g. inter-agency committee)	Yes (8)	Yes (8)
	3. Any "Formal institutional arrangements" among related agencies to manage water pollution	Yes (8)	Yes (8)
	4. Any "Private/public partnership and participation" in managing water pollution	Yes (8)	Yes (8)
MT Indicators	1. Any river water quality master plan at national and local levels	Yes (8)	Yes (8)
	2. Any relocation plans for highly polluting industries in a river basin	Yes (8)	Yes (8)
	3. Any effluent discharge standards	Yes (8)	Yes (8)

ASEAN IWRM PERFORMANCE REPORTS & MONITORING INDICATORS

	4. Any river water quality monitoring program	Yes (8)	Yes (8)
	5. Any river water quality information system/database	Yes (8)	Yes (8)
	6. Any program to disseminate to the public regular report on river water quality status	Yes (8)	Yes (8)
	7. Any groundwater quality monitoring programs and systems	Yes (8)	Yes (8)
	8. Any computer simulation models used to predict river water quality	Yes (8)	Yes (8)
	9. Any public awareness program on water pollution prevention	Yes (8)	Yes (8)
